

continuing trend to larger mills

active redundancy

- modular grinding parts
- modular COPE drive
- unification concept

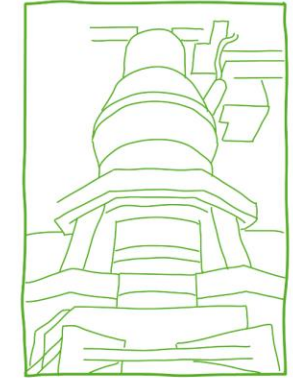

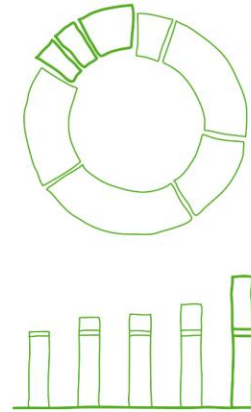

intelligent spare part concept

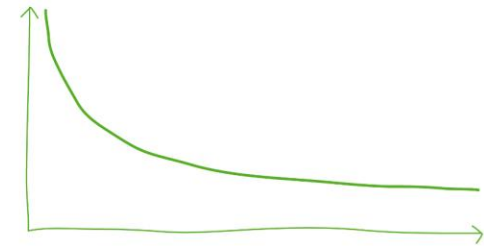

drivers of mill growth

- increasing kiln sizes
- use of supplementary cementitious materials
- economy of scale

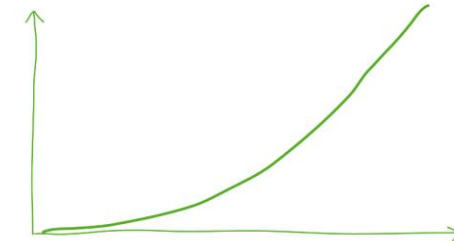

scale-up factor

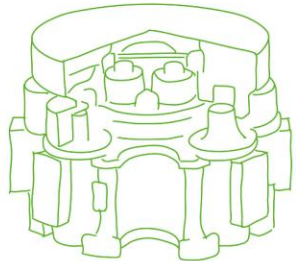

nominal table speed

How to master the market demand for ever larger grinding capacities

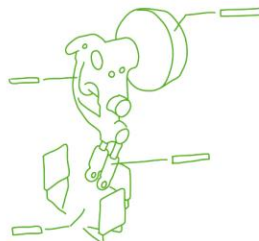

Dr. Mathis Reichert / Process Engineer / LOESCHE GmbH

nominal cement mill capacity

active redundancy where it is necessary

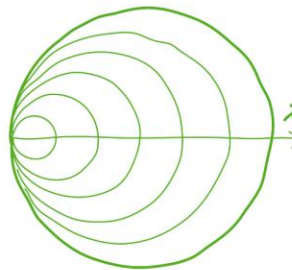

module

operation

capacity

larger mills are possible!
